Objective: A position as an environmental engineer with a company committed to water quality control.

Education:

Berkeley University Berkeley, CA
M.S. in Chemical Engineering 2005

Berkeley University Berkeley, CA
B.S. in Environmental Science 2002

Career Goals: I am dedicated to the field of water quality and environmental safety. Through my summer work with the Institute of Water Studies, I have seen that with hard work, public education and a burning desire for a better future, we can initiate a significant turn-around in global water quality. I want to be part of that future. To that end, I want to work for a company with a proven track record in commitment to water quality projects, accountability to non-profit environmental groups and the vision to invest in continuing research and development.

Experience:

Institute of Water Studies Long Beach, CA
Summer employment 2005 to Present

- Worked with engineers designing and constructing a silicon-based system for oil-spill containment.
- Observed project engineers in planning phase of sewage treatment spills.
- Acted as liaison between Institute of Water Studies and Clean Water Now! environmental group.
- Trained in sewage treatment systems, including project design, reading blueprints, writing technical manuals, awareness of health dangers, water testing, equipment installation and maintenance.
- Learned office procedures.
