

Objective

Senior Biomedical Equipment Technician

Highlights

- Made recommendations for product improvements to corporate management.
- Prepared training materials and provided on-the-job training to less experienced technicians due to my expertise with equipment.
- Sold new equipment to hospital and research management while acting as their equipment technician.

Experience

Regan Corporation

Biomedical Equipment Technician

Carol Stream, IL

December 2008 to Present

- Installed, repaired, calibrated and maintained medical equipment (including patient monitors, blood-gas analyzers, x-ray units and anesthesia apparatus) used in hospitals and research facilities.
- Conferred with hospital and research staff about equipment function.
- Trained hospital and research personnel in correct equipment operation and in basic equipment maintenance procedures.
- Safety-tested medical equipment to ensure patient and staff safety from electrical and mechanical hazards.
- Informed biomedical equipment manager of chronic equipment problems and suggested long-term solutions.

Watersford Hospital

Medical Records Clerk

Marysville, IL

August 2005 to November 2008

- Checked completeness and accuracy of all paperwork in patient files.
- Input information into medical records database.
- Obtained recognition for excellent performance (speed and accuracy) on performance appraisal.
