Objective: Looking for a challenging career in the field of Electronics Engineering, where I can Explore my technical skill and talent.

Key Skills:

- Good in-depth knowledge of electrical equipment and circuit construction techniques.
- Best knowledge of computer with of MS Office and many other operating systems.
- Knowledge of MATLAB, SKILAB, orCAD capture tool and many other electronics software tools.
- Ability of drawing circuit diagram using computer software tools and enough experience of handling electronic devices.

Education: State Central College of New York New York
Bachelors of Science in Electronics. 2011

Experience: Master Devices & Electronics Pvt. Ltd. New York
Junior Electronics Engineer 2011 to Present

- Assisted many senior engineers and learned many new concepts of electronics fields.
- Used all electronics engineering functional areas and learned P&L developments.
- Handled many new electronics equipment's and circuit designing techniques.
- Learned in-depth about installation, repair and maintaining electrical equipment's with their internal design and circuit diagram.
- Gives feedback to vendors and engineers which will help for feature improvements in equipment.
- Used many power electronic systems such as high power motor controller, device power controller and active participation in their relative projects.
